London, United Kingdom

Chief Product Officer, Chief Digital Officer, Managing Director and Founder with a track record of building category-defining businesses across smart home, fintech, healthtech, AI, drones and energy. Led teams of 500+ with direct P&L responsibility at **Hive (Centrica)**, **Smart Tech (Vodafone)** and **Etc. (BT Group)**. Currently CDO at **Nido & Livensa Living**, a CPP Investments PE-backed pan-European platform spanning student, flex and hotel accommodation, and co-founder of **Boxxed.ai**.

I was one of the founding team and **Chief Product Officer at Hive**, where we built the UK's number one smart home platform, scaling from zero to over five million customers. I had full ownership across product, brand and customer experience, designed and launched 15+ products, completed two strategic acquisitions and led international expansion.

From there I became **Chief Product Officer at Vodafone Smart Tech**, where I founded the Consumer IoT division and launched 10 products across 13 countries in three years. I delivered award-winning products including Curve and Neo in partnership with Disney, and led Group-level product design and the rollout of an agile operating model across Vodafone globally.

I then founded and led **Etc, BT Group's innovation and incubation arm**, reporting to the Digital and Technology Board. I scaled two ventures into divisions valued at over £500M each, delivered BT's first cloud-native PCI-compliant payments platform enabling £150M in cost savings, launched the UK's first commercial drone corridor, and led a cross-functional team of over 500 with an 85% engagement score.

I am currently **Chief Digital Officer at Nido and Livensa Living**, a CPP Investments PE-backed pan-European platform spanning student, flex and hotel accommodation, leading digital transformation across product, data and technology. Alongside this I am **co-founder of Boxxed.ai**, a GenAI platform with live paying clients helping SMEs embed AI across their workflows.
